# TANK & VESSEL CLEANING

## SM-AIR LARGE TANK CLEANER

High Flow Tank Cleaning

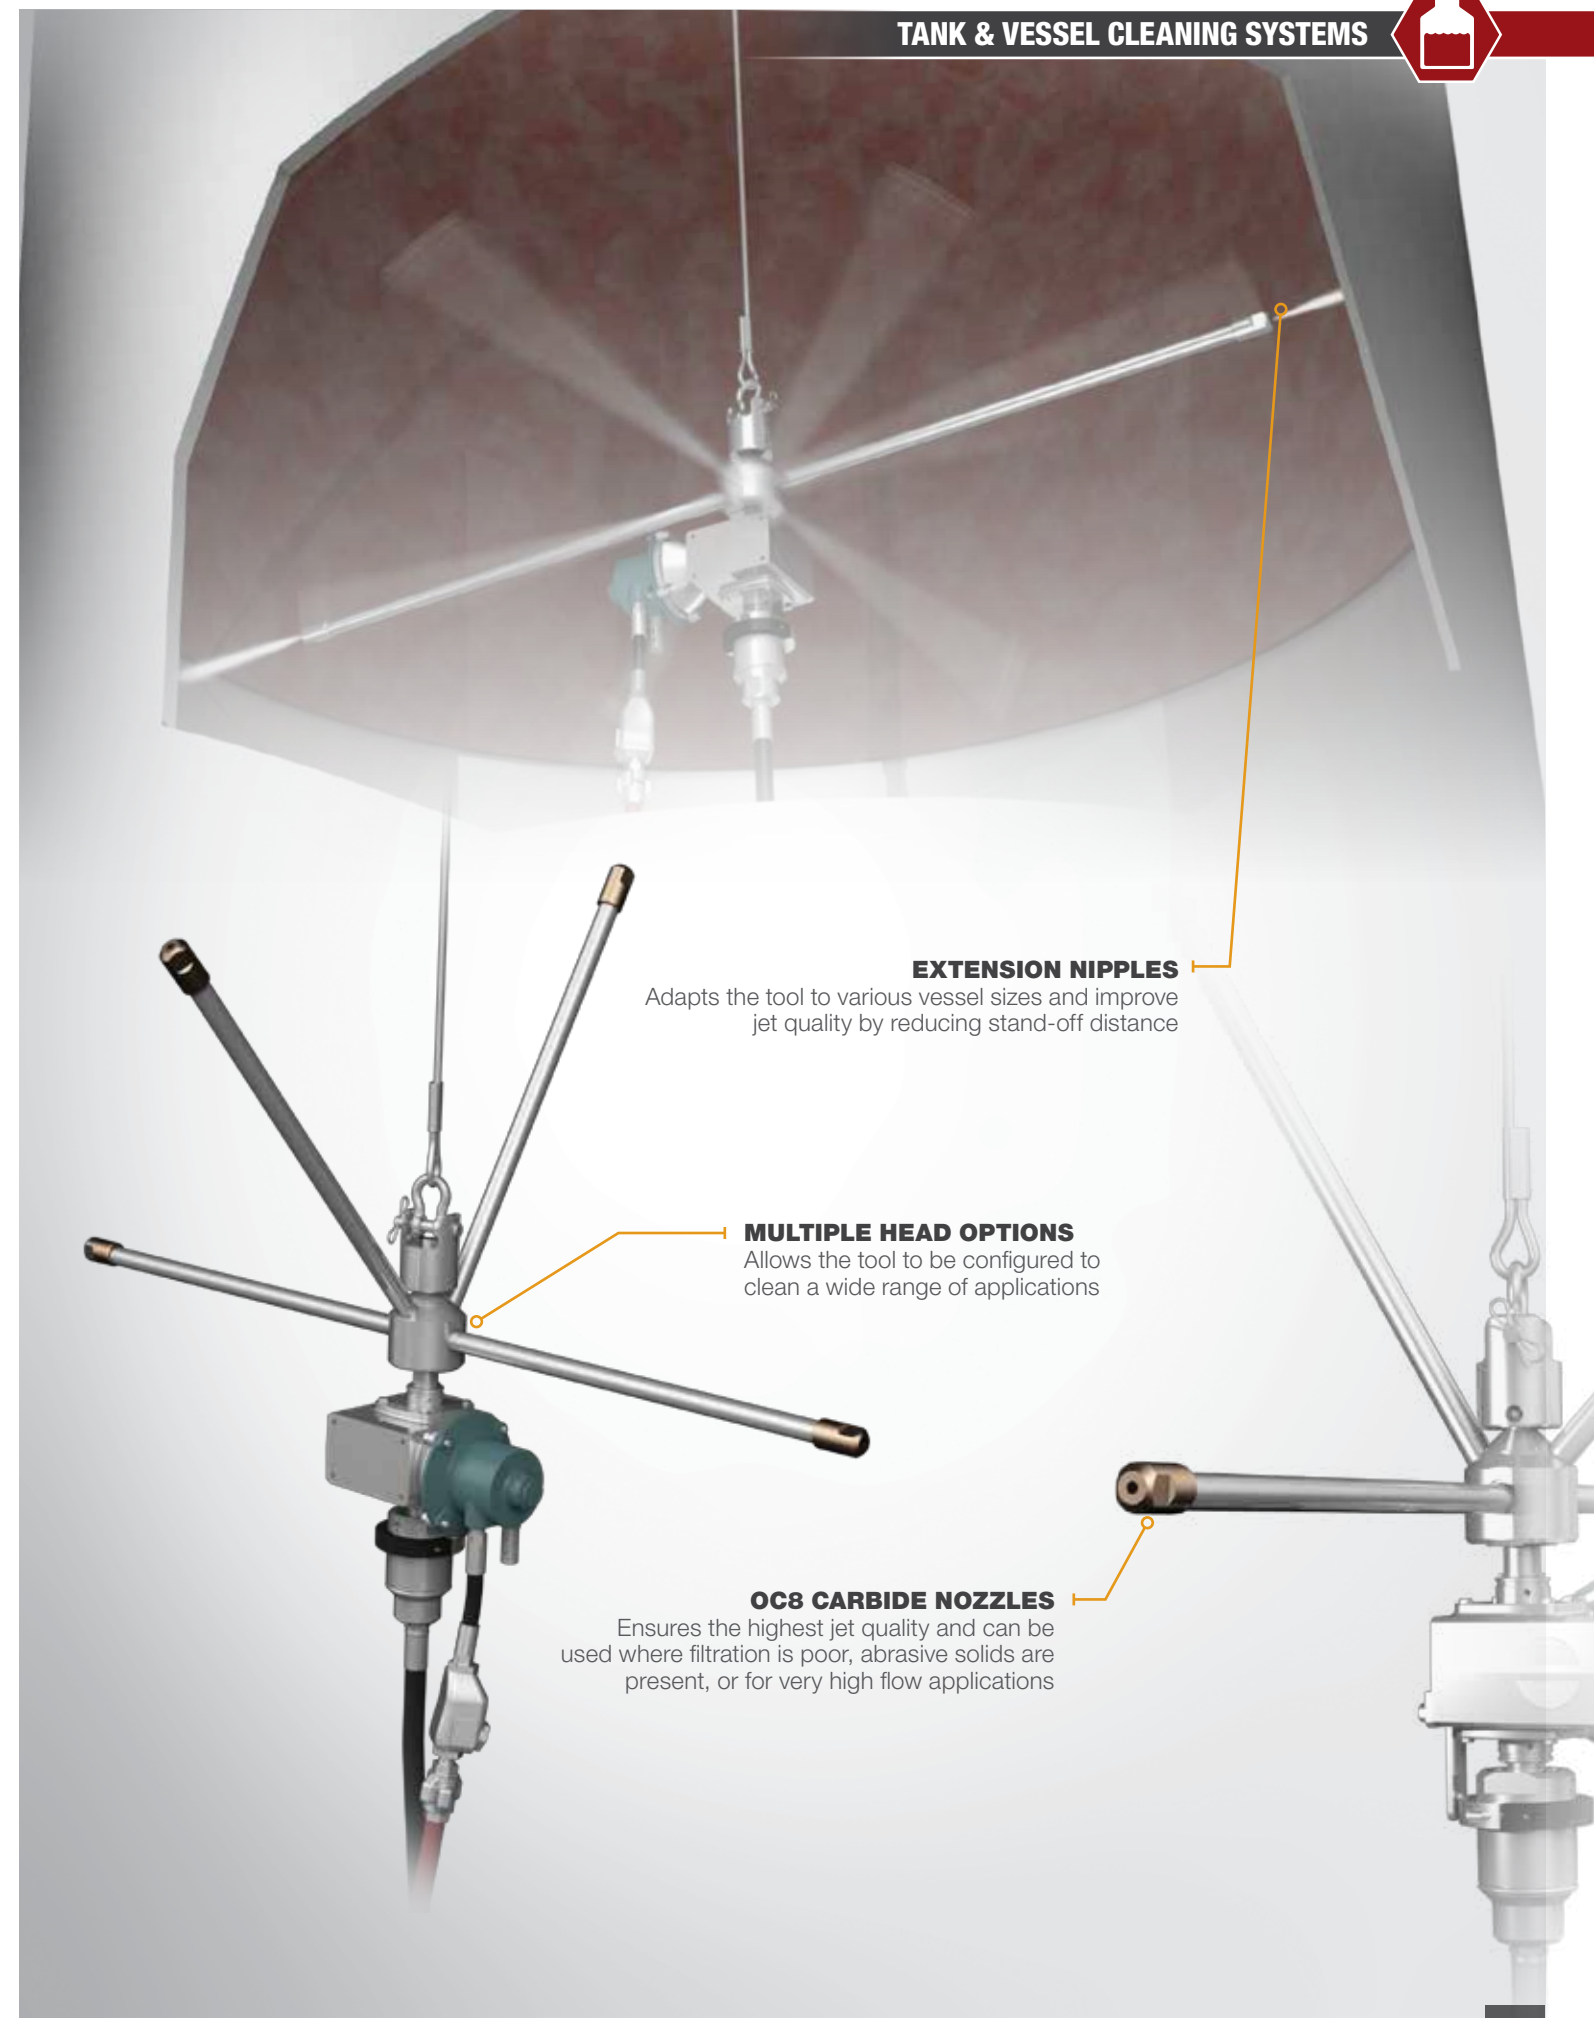

The SM-AIR offers air powered rotation at high flows for effective jet power over long distances. Different head options allow cleaning above and below irregular surfaces.

### FEATURES:

- Versatile and durable gearbox can be used with a variety of head designs for many different applications
- Air-powered rotation provides uniform coverage over a large area
- Variable speed control maximizes efficiency for heavy or light applications
- Ideal for cleaning boilers, furnaces, cyclones, and cokers

Tool Model	Pressure Range	Flow Range	Inlet Connection	Rotation Speed	Weight
SM-AIR	Up to 12k psi 830 bar	Up to 300 gpm 1140 l/min	1 NPT	10-70 rpm	78 lb 35 kg

**EXTENSION NIPPLES**  
Adapts the tool to various vessel sizes and improve jet quality by reducing stand-off distance

**MULTIPLE HEAD OPTIONS**  
Allows the tool to be configured to clean a wide range of applications

**OC8 CARBIDE NOZZLES**  
Ensures the highest jet quality and can be used where filtration is poor, abrasive solids are present, or for very high flow applications
